INDEX

Abdominal symptoms in polyarteritis nodosa, 267.
Aetiology of chloroma and the nature of the green pigment: a report of three cases, 299; pigment of chloroma, 307.
Amoebiasis, treatment of, 1; specific drugs, 2; pathological and clinical considerations, 10; choice of treatment, 12; refractory cases of chronic amoebic dysentery, 13; tests of cure, 18; enemy propaganda, 19.
Amoebic dysentery, chronic, refractory cases of, 13.
Anaemia, heart in, 107.
Anomalies of intestinal absorption of fat: 1. The determination and significance of faecal fat, 141.
Arteritis, temporal: a generalized vascular disease, 47; blood-pressure and laboratory findings, 53.

Beriberi, description of an outbreak of, with special reference to the aetiology of beriberi and epidemic dropsy, 91; the syndrome, 93; the diet, 95.
Blackwater fever, 'formes frustes' of, 39.
Blood, lead content of, and its relation to rarefying processes in bone, 77.
Blood-pressure and temporal arteritis, 53.
Bone, rarefying processes in, lead content of blood and its relation to, 77.

Carbohydrate metabolism, investigations of, in glycogen disease, 289.
Carcinoma, prostatic, diagnosis of, estimation of prostatic phosphatase in serum and its use in, 221.
Cardiovascular system in polyarteritis nodosa, 264.
Changes in the Parkinsonian syndrome in the twentieth century, 155.
Childhood, polyarteritis nodosa in, 279.
Chloroma, aetiology of, and the nature of the green pigment: a report of three cases, 279; pigment of, 307.
Classification of cases of glycosuria, 243.
Clinical aspects of polyarteritis nodosa, 255; natural history of the disease and its general features, 260; cardiovascular system in polyarteritis nodosa, 264; abdominal symptoms: surgical aspects, 267; neurological features and ocular findings, 272; respiratory system and radiological aspects, 275; skin manifestations, 277; polyarteritis in childhood, 279.
Complete congenital agenesis of a lung, 125; evolutionary development of lungs, 132; structure of the existing lung, 134; other congenital abnormalities, 135.
Craniofacial dysostosis: the significance of ocular hypertelorism, 171; ocular hypertelorism, 172.

Description of an outbreak of beriberi, with special reference to the aetiology of beriberi and epidemic dropsy, 91; the syndrome, 93; the diet, 95.
Dropsy, epidemic, description of an outbreak of beriberi, with special reference to the aetiology of beriberi and, 91.
Dysentery, amoebic, chronic, refractory cases of, 13.

Epidemic dropsy, description of an outbreak of beriberi, with special reference to the aetiology of beriberi and, 91.
Epidemiology of the 1945 outbreak of poliomyelitis in Mauritius, 183; the island and its population, 183; method of field survey, 186; animal inoculation, 187; general epidemiological findings, 189; course of the epidemic, 191; method of spread of infection, 197; attack rates per 1,000 in certain sections of the population, 199.
Estimation of prostatic phosphatase in serum and its use in the diagnosis of prostatic carcinoma, 221.

Faecal fat, determination and significance of, 141.
Fat, faecal, determination and significance of, 141.
— intestinal absorption of, anomalies of: 1. The determination and significance of faecal fat, 141.

Fever, blackwater, 'formes frustes' of, 39.
'Formes frustes' of blackwater fever, 39.

Glycogen disease, 285; investigations of carbohydrate metabolism, 289.
Glycosuria, cases of, classification of, 243.

Haemoglobinuria, pamaquin, 25; 'formes frustes' of blackwater fever, 39.
Heart in anaemia, 107.

Intestinal absorption of fat, anomalies of: 1. The determination and significance of faecal fat, 141.

Lead content of the blood and its relation to rarefying processes in bone, 77.
Lung, complete congenital agenesis of a, 125; evolutionary development of lungs, 132; structure of the existing lung, 134; other congenital abnormalities, 135.

Metabolism, carbohydrate, investigations of, in glycogen disease, 289.

Neurological features in polyarteritis nodosa, 272.

Ocular findings in polyarteritis nodosa, 272.
— hypertelorism, 172.
— manifestations of tuberose sclerosis, 209.

Pamaquin haemoglobinuria, 25; 'formes frustes' of blackwater fever, 39.
Parkinsonian syndrome, changes in, in the twentieth century, 155.
Phosphatase, prostatic, estimation of, in serum and its use in the diagnosis of prostatic carcinoma, 221.
Poliomyelitis, epidemiology of the 1945 outbreak of, in Mauritius, 183; the island and its population, 183; method of field survey, 186; animal inoculation, 187; general epidemiological findings, 189; course of the epidemic, 191; method of spread of infection, 197; attack rates per 1,000 in certain sections of the population, 199.
Polyarteritis nodosa, clinical aspects of, 255; natural history of the disease and its general features, 260; cardiovascular system in, 264; abdominal symptoms: surgical aspects, 267; neurological features and ocular findings, 272; respiratory system and radiological aspects, 275; skin manifestations, 277; in childhood, 279.
Proceedings of the Association of Physicians of Great Britain and Ireland, 1946: Fortieth Annual General Meeting, 313.
Prostatic carcinoma, diagnosis of, estimation of prostatic phosphatase in serum and its use in, 221.
Prostatic phosphatase, estimation of, in serum and its use in the diagnosis of prostatic carcinoma, 221.

Respiratory system and radiological aspects in polyarteritis nodosa, 275.

Sclerosis, tuberose, ocular manifestations of, 209.
Serum, estimation of prostatic phosphatase in, and its use in the diagnosis of prostatic carcinoma, 221.
Skin manifestations in polyarteritis nodosa, 277.

Temporal arteritis: a generalized vascular disease, 47; blood-pressure and laboratory findings, 53.
Treatment of amoebiasis, 1; specific drugs, 2; pathological and clinical considerations, 10; choice of treatment, 12; refractory cases of chronic amoebic dysentery, 13; tests of cure, 18; enemy propaganda, 19.
Tuberose sclerosis, ocular manifestations of, 209.
